

4821 Reconstruction

Update November 18, 2010

Randy Snider from Hubbell Corporation attended the monthly Board of Directors meeting on November 16, 2010 to discuss the status of the reconstruction effort.

Hubbell Corporation is diligently working with the structural engineer on improvements in the garage that are required by the City of Urbandale to update the structure in order to meet the current building code requirements. Once the updates have been completed, Hubbell Corporation can begin building on top of the slab.

While this work is underway, Hubbell Corporation is coordinating their efforts with the subcontractors. The building trusses are being engineered and fabricated. Building materials that were specified by the architect are in the process of being ordered and stockpiled.
